SUMMARY

IT undergraduate (graduating May 2027) at Anna University — MIT Campus with hands-on experience in full-stack development, data libraries, and system-level concepts. Built and deployed a Spring Boot quiz platform with role-based authentication. Placed top 50 at Smart India Hackathon. Comfortable picking up new stacks quickly and contributing across the full development lifecycle.

EDUCATION

Anna University — MIT Campus, Chennai

Expected May 2027

B.Tech, Information Technology

Heartfulness International School — Omega, Chennai

May 2023

Higher Secondary, Computer Science

TECHNICAL SKILLS

Languages:	Java, Python, C, C++, JavaScript, HTML/CSS
Frameworks & Libraries:	Spring Boot, React, Node.js, Thymeleaf, Streamlit, NumPy, Pandas, scikit-learn
Tools & Platforms:	Git, GitHub, VS Code, Figma, Canva, Arduino
Concepts:	Data Structures & Algorithms, Computer Networks, OOP, Machine Learning

PROJECTS

Online Quiz System

Java · Spring Boot · Thymeleaf · H2 Database

- Built a full-stack quiz platform with role-based authentication — separate login flows and dashboards for students and teachers.
- Implemented dynamic question rendering, answer submission, and live result display using Thymeleaf templates and Spring MVC.
- Managed data persistence with H2 in-memory database; followed MVC design pattern throughout the codebase.

Telco Customer Churn Prediction

Python · scikit-learn · Keras · Pandas · Seaborn

- Trained and compared 5 models (Logistic Regression, KNN, Decision Tree, Random Forest, ANN) on a Kaggle telecom dataset to predict customer churn.
- Built a Keras ANN with 2 hidden layers and binary crossentropy loss; visualised accuracy comparisons, confusion matrices, and feature importances.
- Covered the full ML pipeline — data cleaning, label encoding, standard scaling, model training, and evaluation.

ACHIEVEMENTS

- Ranked in the top 50 teams (college-level) at Smart India Hackathon out of hundreds of participating teams.
- Attended 'AI-Frontiers' and 'Blockchain Beyond Cryptocurrency' workshops independently, driven by interest beyond coursework.

VIRTUAL INTERNSHIP SIMULATIONS

Deloitte Australia — Cyber Security Simulation (Forage)

- Analyzed web activity logs to identify suspicious user behavior during a simulated security breach scenario.

Wells Fargo — Software Engineering Simulation (Forage)

- Designed an ERD for a financial portfolio management system and implemented it in VS Code; published to GitHub.

SOFT SKILLS

- **Problem Solving** — Comfortable breaking down complex technical challenges into manageable steps.
- **Self-Learning** — Consistently picks up new technologies beyond coursework through projects and workshops.
- **Adaptability** — Quick to adjust to new tools, environments, and fast-paced team settings.
- **Team Collaboration** — Experienced working in team settings including hackathons and group projects.
- **Communication** — Able to clearly articulate technical concepts and project progress to peers and mentors.
