OBJECTIVE

Motivated and detail-oriented Python Developer with strong foundations in backend development, data structures, and API design. Seeking a remote opportunity to build scalable applications and contribute to impactful projects while continuously enhancing technical expertise.

TECHNICAL SKILLS

- **Languages:** Python, Java, C++
 - **Frameworks:** Flask, Django
 - **Web Technologies:** HTML, CSS, JavaScript
 - **Databases:** MySQL, PostgreSQL
 - **Tools & Platforms:** Git, Docker (Basics), AWS (Basics)
 - **Core Concepts:** OOP, Data Structures & Algorithms, REST APIs
-

PROJECTS

- ◆ **Resume Parser using NLP (Streamlit + Python)**
 - Developed a web application to extract skills from PDF/DOCX resumes
 - Implemented text extraction using pdfplumber and python-docx
 - Built a skill-matching system using predefined datasets
 - Improved parsing accuracy using basic NLP techniques
 - ◆ **Task Manager API (Flask)**
 - Designed RESTful APIs for task management system
 - Implemented CRUD operations with MySQL database
 - Integrated authentication and error handling
 - Tested endpoints using Postman
 - ◆ **Personal Portfolio Website**
 - Created a responsive portfolio using HTML, CSS, and JavaScript
 - Showcased projects and GitHub repositories
 - Optimized UI/UX for better user engagement
-

EDUCATION

Bachelor of Engineering in Information Technology
XYZ Engineering College, Chennai
2022 – 2026

CERTIFICATIONS

- Python Programming Certification – Coursera / Udemy
 - Introduction to Machine Learning – (Optional)
-

ACHIEVEMENTS

- Built multiple academic and personal projects in backend development
 - Strong problem-solving skills with consistent practice in coding platforms
 - Actively learning modern technologies like AI and Cloud
-

SOFT SKILLS

- Problem-solving mindset
 - Team collaboration
 - Adaptability in remote environments
 - Time management
-

ADDITIONAL INFORMATION

- Open to remote work and flexible schedules
- Quick learner with a passion for technology
- Available for immediate joining
